Lea Michele's Skincare Obsession

Who knew copper was good for the skin? Lea Michele, for one. The triple-threat star took to Instagram to rave about the miracle mineral, a key ingredient in a face mist she recently discovered. "Absolutely my favorite new product," she wrote of **iS CLINICAL®'S COPPER FIRMING MIST**, adding, "Not an ad. Just obsessed." The spritz is formulated with copper PCA (pyrrolidone carboxylic acid) and the antioxidant resveratrol, and multitasks as a toner, hydrator, makeup-setting spray and - if Lea's skin is any indication - an overall glow booster.

"Absolutely my favorite new product! I love @iSCLINICAL and this is the best! 💙"
